An impressive product from Zink Imaging and Pandigital, the Pandigital Portable Photo Printer is the first of its kind to feature a zero ink 4x6in photo printer. This printer with its new age technology is designed to appeal to a broad spectrum of people all around the world.

One of the best features of the Pandigital Portable Photo Printer is undeniably its portability. It weighs an impressive 1.75 pounds along with a full tray of paper. Adding to that is the awesome size that measures at 1.5 by 6.2 by 6.75 inches (HWD) - a really compact small size that you can conveniently carry around with you. As the name suggests, this is truly portability in a printer at its best.

This new age printer is designed with a purpose to attract the modern user who prefers something light, portable, and comfortable to use. Moreover, Zink

technology has designed this portable printer keeping environmental issues in mind. This environmental friendly product aims to perform immaculately, maintaining sheer simplicity in printing. The Pandigital Portable Photo Printer is truly a wonderful blend of high-end technology and path breaking design.

This portable printer is very much in tune with most other devices designed by Zink technology that focus more on simplicity of design and ease of usage. The Pandigital Portable Photo Printer is definitely a good buy for everyone and it is as light as a printer can get.

Although the Pandigital Portable Photo Printer has its share of downsides, such as a not so satisfying inkjet quality, the positives far outweigh the negatives. Compared to most other small format printers, this product of Zink certainly wins over with its light weight.

Another attractive feature of this portable printer is the patented Zink paper that makes printing an immensely easy and comfortable activity. Through this technology, the ink is embedded into the paper as yellow, magenta, and cyan dye crystals. What you have is an amazingly light and portable printer without any ribbons, or ink cartridges. This also means that all you will really need to carry is paper.

More: [Photo Printer](#) | [Inkjet Printer](#)

One of the main selling points of the Pandigital Portable Photo Printer is most certainly its ability to work without a computer. You can conveniently take it wherever you go and print as many photos as you like. Other attractive features include an intuitive user interface to preview and print photos through a button, an LCD preview, as well as a memory card slot.
