FOR IMMEDIATE RELEASE

Pandigital Personal Photo Scanner/Converter Digitizes Images up to 8 ½ x 11-inches, Making Them Easy to Share and Enjoy

New scanner features one-touch scanning and fast transfer for immediate enjoyment

Dublin, Calif., July XX, 2010 – Pandigital announced today that it has expanded its line of innovative photo scanners with a new model – the [Pandigital Personal Photo Scanner/Converter](#) – that can scan print photos up to 8 ½ x 11-inches large. (I PUT THIS B/C STANDARD PHOTO SIZE IS 8X10, SO I'M THINK LISTING IT THE OTHER WAY WAS WEIRD.)

Incredibly simple to use, the Pandigital Personal Photo Scanner/Converter requires no PC to convert print photos into digital images. Consumers can simply plug it in, insert their photo through the slim device, and, with a single touch of a button, scan photos onto the included SD card. Consumers can then insert the SD card loaded with full-color JPEG images into their computer to upload the photos or insert the card into their Pandigital digital photo frame to immediately view the images.

While the Pandigital Personal Photo Scanner/Converter (PANSCN06) can accommodate photos up to 8 ½ x 11-inches large, it can also scan in photos as small as wallet-sized or any size in-between.

“Consumers everywhere have photos that they want to preserve for future generations,” said Dean Finnegan, CEO and founder, Pandigital. “The new Pandigital Personal Photo Scanner/Converter lets families easily archive (MJ – I AM NOT COMMITTED TO THIS EDIT, BUT THE “MOST ALL OF THE IMAGES” SEEMS AWKWARD) precious moments and milestones such as weddings, yearly school photos, and sporting events are often captured as large 8 x 10-inch prints.”

Pandigital’s award-winning line of scanners have been acclaimed for their ease-of-use and excellent performance. The scanner does not require any expensive or confusing software and employs a new twin-roller feeding system to ensure that the photos are scanned evenly each time. Further optimizing the quality, images are scanned at up to 600 optical dpi for resulting scans that have a crisp and clear 3800x7200 24-bit color depth resolution. In addition to being able to scan images onto the included SD memory card, the scanner accepts other popular memory cards (SD, MS, MS Pro, MMS, XD) and can also be connected directly to either a Mac or PC computer via its mini-USB port.

Weighing in at less than a pound at only 13.79 ounces and measuring only 10.59(L) x 1.73(H) x 2.32(D) inches, the Pandigital Personal Photo Scanner/Converter is incredibly portable and can be taken nearly anywhere to quickly and simply preserve images.

The new Pandigital Personal Photo Scanner/Converter extends Pandigital’s line of photo scanners which also includes the [Pandigital PhotoLink One-Touch 5x7 Scanner](#) and the [Pandigital Photo & Negative Scanner](#) that can scan print images up to 4x6-inches large as well as negatives.

Product Availability and Pricing

The Pandigital Personal Photo Scanner/Converter is available now for a Manufacturer's Suggested Retail Price of \$149.99.
